(CAMSP) , support children with autisms and intellectual disabilities (IME), support adults at home with multiple disabilities, impaired motor, intellectual disabilities (PFS)

3 transverse axes wich affect all children, adolescents and adults

- **Art and culture** : Introduced by C.E.M, in 2002, the art and the culture became over time and shows a tremendous tool of valuation. Numerous workshops and projects were born. These workshops and their public displays are also, for the accompanied people, the opportunity to assert the existence of a shape of different art another way of questioning our society about its values and the place which she reserves to the people in situation of handicap.

- **Sport project**

- **Emotional life and sexuality** : ow to reconcile this dependency with a practice that usually falls under the strict privacy?
